Winner in the Waste Reduction, Recycling
& Composting Division
for the Recycling Systems Award

2006 SWANA Excellence Silver Award

Winner in the Special Waste Division
for Special Waste Management Award

As a demolition contractor and hauler, Interior Removal Specialist, Inc. (IRS) has complete control over the waste stream from the start of the job through the final residual debris going to landfill. IRS diverts 72% of all debris generated, diverting materials not even being considered by most other facilities.

As one might expect, steel, copper, aluminum, concrete, asphalt, and cardboard are regularly diverted. However, IRS has researched and found markets for drywall, used cabinetry, carpet, ceiling tile, and office furniture. In fact, they ship 9,600 tons of drywall, 140 tons of ceiling tiles, and 350 tons of carpet for recycling each year.

The IRS donation program has steadily grown to an average of 1,400 tons of salvaged materials donated every year to many non-profit organizations that have no other outlet. To date, IRS has donated more than 3,400 tons of materials to charities and the requests from non-profits are steadily increasing as the word gets out.
